

International cooperation is essential for fostering global connectivity and building resilient logistics systems. Geopolitical shifts and climate change present significant challenges that could disrupt the efficient operation of these systems. In the face of global instability, diversification and redundancy in transportation systems and modes are vital, with supply security forming the backbone of the global economy's smooth functioning. How can the resilience of value chains be bolstered amidst geopolitical pressures while navigating these dual transitions? How can logistics adapt to and capitalize on the new wave of potentially protectionist industrial policies? What strategies can be employed to mitigate risks, particularly for Europe, Italy, and the businesses involved?
