

CONTENTS

- Sciunnach D., Tremolada F., Premoli Silva I. & Scardia G. – *The Middle Eocene in the Alpine retroforeland basin (Northern Italy): sedimentary record of a “meso-alpine” arc-trench system in the Alps*
- Ridente D. – *Martin Lister’s 1678 Ammonis cornu and the misreading of Hildoceras bifrons (Bruguière, 1789). An historical insight on the relevance of artwork and details in taxonomy*
- Jaselli L. & Pieroni V. – *Middle Triassic echinoderms from the San Salvatore Formation of Lombardy (Italy) and Canton Ticino (Switzerland)*
- Robledo J.M., Barasoain D., Quiñones S.I., Landa Ramirez E.M., Zurita A.E. & Galli C.I. – *Reconstructing the Late Miocene paleoenvironment of northwestern Argentina: new sedimentological and faunistic evidence from the Palo Pintado Formation*
- Renesto S. & Saller F. – *Differences in the hindlimb anatomy in the two species of the Late Triassic drepanosauromorph diapsid Megalancosaurus indicate habitat partitioning within the arboreal environment*
- Dernov V. – *First evidence of color patterns on conchs of the lower Moscovian (Middle Pennsylvanian) coiled nautiloids from the Donets Basin, Ukraine*
- Ghandour I.M., Bălc R., Faris M., Helal S., Mosa G.A. & Aljahdali M.H. – *New insight into the Middle Eocene calcareous nannoplankton biostratigraphy and paleoenvironment from Fayoum and Beni Suef Areas, Egypt*
- Niknahad M., Vaziri M.R., Lotfabad Arab A. & Rivals F. – *Dietary traits of Late Miocene hipparions from Maragheh revealed through dental wear*
- Serobyan V., Danelian T., Hairapetian V., Grigoryan A., Crônier C., Randon C. & Mottequin B. – *Frasnian (Upper Devonian) brachiopods from Armenia: biostratigraphic and palaeobiogeographic implications*
