

CONTENTS

- Golding M.L. & Kiliç A.M. – Reconstruction of the multielement apparatus of the conodont *Gladigondolella tethydis* (Huckriede) using multivariate statistical analysis; implications for taxonomy, stratigraphy, and evolution
- Carnevale G. & Tyler J. C. – A new moorish idol (Teleostei, Zanclidae) from the Eocene of Bolca, Italy
- Dietzel C.A.F., El Atfy H., Berthold C., Reza Majidifard M. & Böhme M. – Reworked Mesozoic radiolarians in Miocene-Pliocene foreland sediments in the Zagros Belt, Iran
- Fatka o., Budil P. & Mikuláš R. – Remains of the alimentary tract in the Late Ordovician trilobite *Dalmanitina* (Prague Basin, Barrandian area, Czech Republic)
- Buchner L., Linhart S., Kalmar G., Arce S., Haug G.T., Haug J.t. & Haug C. – New fossil lacewing larvae with trumpet shaped elongate empodia provide insight into the evolution of this attachment structure
- Demangel I., Grădinaru e., Lazăr I., Seghedi A. & Munteanu I. – First evidence of Palaeo-Tethyan Upper Triassic calcareous nannofossils in North Dobrogean Orogen (Romania)
- Serafini G., Danise S., Maxwell E.E., Martire L., Amalfitano J., Cobianchi M., Thun Hohenstein U. & Giusberti L. – Of his bones are crinoid made: taphonomy and deadfall ecology of marine reptiles from a pelagic setting (Middle-Upper Jurassic of northeastern Italy)
- Girone A., Garassino A., Pasini P., Zazzera A., Gallicchio s., Maiorano P., Marino M. & La Perna R. (2024) – New report of decapod and isopod crustaceans from the Lower-Middle Pleistocene of Montalbano Jonico, Matera (Basilicata, Southern Italy)
- Roux M., Martinez-soares P., Fornaciari E., Gatto R., Papazzoni C.A. & Giusberti L. – Eocene stalked crinoids in the genus *Isselicrinus* (Echinodermata, Crinoidea, Isocrinida) from northeastern Italy
